# Table of Contents

## [Section A: Computing and Communications]

- Runtime Verification in Distributed Computing ................................................................. 1-10  
  Somayeh Malakuti, Mehmet Aksit and Christoph Bockisch

- A Two-Level Caching Protocol for Hierarchical Peer-to-Peer File Sharing Systems .................. 11-16  
  Qiyong WEI, Tingting QIN, Satoshi FUJITA

## [Section B: Security and Trust]

- Concurrent Error Detection Adder Based On Two Path Output Computation .......................... 17-22  
  Chiraz Khedhiri, Mouna Karmani, Belgacem Hamdi, Ka Lok Man

- Security Enhanced Communication in Wireless Sensor Networks Using Reed-Muller Codes and Partially Balanced Incomplete Block Designs ......................................................... 23-30  
  Pinaki Sarkar, Amrita Saha

- A Configurable Approach to Toleration of Soft Errors via Partial Software Protection .............. 31-38  
  Lei Xiong, Qingping Tan

- Selection of Model in Developing Information Security Criteria for Smart Grid Security System ......................................................... 39-46  
  Amy Poh Ai Ling, Mukaidono Masao

- Two-Layer Security Scheme for AMI System ........................................................................... 47-52  
  Ping-Hai Hsu, Wenshiang Tang, Chiakai Tsai, Bo-Chao Cheng

- Towards a Practical and Scalable Trusted Software Dissemination System ............................ 53-60  
  Deng Chuan, Yang Lin, Ma Linru, Cao Yuan

- Trusted Computing Dynamic Attestation Using a Static Analysis based Behavior Model ........... 61-68  
  Tong Li, Fajiang Yu, Yang Lin, Xueyuan Kong, Yue Yu

- Parallel Point-multiplication based on the Extended Basic Operations on Conic Curves over Ring Zn 69-78  
  Yongnan Li, Limin Xiao, Siming Chen, Hongyun Tian, Li Ruan, and Binbin Yu

## [Section C: Web and Multimedia]

- Phoenix: a Fault-tolerant Distributed Web Storage based on URLs ........................................ 79-86  
  J. L. Gonzalez, Ricardo Marcelín-Jiménez

- Explorative Visualization and Analysis of a Social Network for Arts: The Case of deviantART ......................................................... 87-94  
  Bart Beter, Nick Dijkstra, Davide Modolo, Quang Nguyen, Sander van Noort, Bart van de Poel, Albert Ali Salah, Alkim Almila Akdag Salah
